## STUDIO - Studio laGeste

Wooden sprung floor with a total surface of about 14m x 20m, maximal load 150kg/m<sup>2</sup>.

On the wooden sprung floor, there is a black dance carpet : 10 lanes of 14m x 1m50, total surface 14m x 15m.

The studio can be made dark : outside windows electrically controlled, inside windows with black curtains on rail.

Accessibility: Studio laGeste, including the toilet, are wheelchair accessible.

Maximum number of people in Studio laGeste: 300.

Concrete walls, black curtains on rail on three sides.

On the ceiling of the studio, there are 6 I-beams, in the length of the studio, with a maximum point load of 500kg. Free height under the I-beams : 7m90. Under the I-beams, there are trolleys (manually controlled).

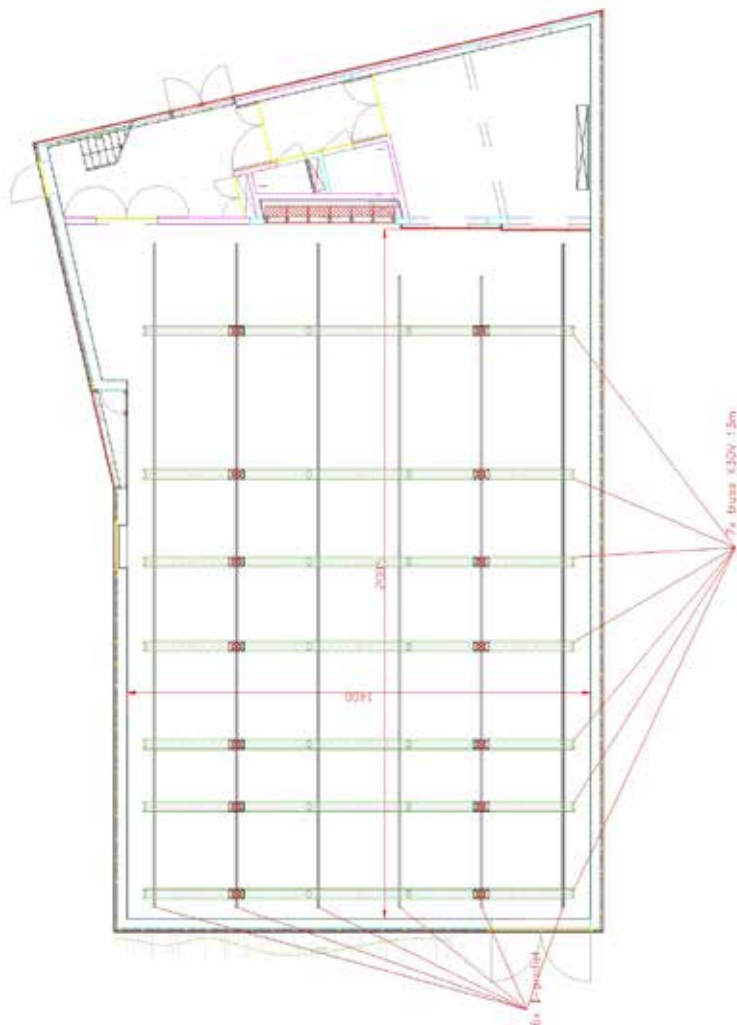

7x truss Prolyte X30V (square 30cm x 30cm) 13m, each on 2 motors Prolift PLF-11 (500kg). Maximum free height under the trusses : 6m90. The motors hang on trolleys, so they can be moved in the length of the studio. Motor control : maximum 4 motors can move at the same time.

Maximum point load under one of the motors : 450kg. Maximum point load in the middle of the truss : 300 kg. Maximum load at the end of the truss : 80kg. Maximum total load of the truss : 500kg.

1 ALP lift.

---
